

Going green just got easier.

What's green?

Some of the most unique and modern designs are made out of recycled materials, and from pre-consumer glass that glitters like an emerald embellished surface to scrap aluminum with awe inspiring reflecting properties, at TWD Surfaces we have it all.

Our green products are LEED certified; an accreditation developed under the United States Green Building Council in order to transform the built environment to sustainability by providing the building industry with consistent, credible standards for what constitutes a green building.

It's our goal at TWD Surfaces to make 2009 our *greenest* year ever.

Visit our showroom or www.twdsurfaces.com to learn more about the products we offer. Call 508.279.2650 for more information.
